

## Description

Model of a portion of the excavated area of the Roman Bath in the city of Alhama de Murcia, Spain. This model was created from 5 laser scans from Faro Focus S70. These data were aligned in FARO SCENE 7.1 and meshed and postprocessed in Meshlab. The original model of 65M faces was retopologized using Instant Meshes. The resulting model was reimported back into Meshlab for coloring before posting.
