

## Description

BHS 3 is a Bronze Age (Wadi Suq period) oval shaped, subterranean stone-lined tomb constructed from seven stone courses that decended to a depth of 1.1 meters. Investigations of this tomb resulted in the discovery of two burial levels. The lower level, dating to the Wadi Suq period, contain a number of skeletons mostly in disturbed condition. The upper burial level contained only a few skeletal remains. Grave good excavated at the site include bronze arrowheads, Wadi Suq pottery, and numerous pieces of jewlery.
