

## Description

This point cloud was collected using three FARO Focus3D laser scanners in 2017. The main square (plaza mayor) of San Carlos del Valle stands in the historical and cultural center of the town, presenting an excellent state of preservation. It was built in the 18th century as a large public space intended to house the market, celebrations, important or solemn events and leisure spaces. The square is almost rectangular in shape and is delimited by large arcaded galleries formed by beautiful stone columns. The upper galleries of the square are open as they served to contemplate the public shows organized in the square. On one of its sides stands the church of the Santísimo Cristo del Valle, built in the 18th century on an old hermitage. The square also housed the Town Hall and a Hostelry that allowed travelers and pilgrims to be accommodated.

## Specifications

**Country:** Spain

**Region:** Castilla-La Mancha

**Age:** Modern Age

**Digitization method:** Laser Scanner

**Hardware:** FARO Focus3D S70
