

Description

Main portal of access to the medieval Hermitage of the Virgin of Océn in La Hortezuela de Océn (Guadalajara, Spain). This medieval hermitage is located next to the remains of an old castle. Possibly the hermitage was reformed in the XV century. At that time, this beautiful late Gothic style portal was built, where its ogee arch stands out.

We want to publicly thank the collaboration of the Diocesan Delegation of Cultural Heritage of Guadalajara, especially by its cultural delegate Mr. Miguel Ángel Ortega Canales, for the facilities they have given us and for the interest they have shown in the project at all times.
